## EXECUTIVE SUMMARY

Motivated beginner eager to start professional journey and grow in the tech field by learning technical skills and developing problem-solving skills through small projects and practice. Known for being curious, adaptable, and ready to learn from every opportunity. Looking to work with a team where I gain hands-on experience and build a strong foundation for my career.

## EDUCATION

B.E– Computer Science and Engineering ($7^{th}$ Semester) 2023–2027
GOPALAN COLLEGE OF ENGINEERING AND MANAGEMENT, HOODI, BENGALURU.
CGPA : 8.7

PUC / 12th | SHRI RAM GLOBAL SCHOOL 2023
CBSE | 71.4%

10th | VAGDEVI VILAS SCHOOL 2021
CBSE | 83.4%

## TECHNICAL SKILLS

- Python Programming
- C Programming
- JavaScript / TypeScript
- Kotlin
- Git & GitHub
- AI / Machine Learning Basics
- Graphic Designing

## INTERNSHIP

**Synthetic Gaze-Estimation Dataset Pipeline (Unreal Engine, Python)** **FEBRUARY-2025 – MAY-2025**

Developed a synthetic dataset generation pipeline in Unreal Engine that produces labeled training data for gaze-estimation models. Automated image capture of a MetaHuman character across a range of gaze angles and camera perspectives using Python scripting, with head movement driven through Animation Blueprint bone transforms (Modify Bone) to avoid mesh distortion. Rendered captures to a clean 1920×1080 render target for artifact-free frames.

## ACADEMIC PROJECTS

**Essential Expense Tracker – Android app (Kotlin, Jetpack Compose)** **AUGUST-2026**

Built a full-featured personal finance tracker with Jetpack Compose and Material 3, following MVVM with Hilt dependency injection and a Room database (16 schema migrations) as the offline-first source of truth. Implemented two-way Google Sheets synchronization with per-record sync status and retry handling, so all transactions, categories and budgets stay backed up and editable from a spreadsheet. Shipped budgets with threshold alerts, recurring autopay rules, friend lending and settlements, spending reports with charts, a home-screen widget, quick-add overlay, and biometric/MPIN app lock.

**T7 Learning Hub** **MARCH-2026**

T7 Learning Hub is a full-stack learning platform designed to help students access educational resources, organize learning materials, and track their learning progress. It features secure authentication, a responsive user interface, and scalable backend services. The platform also includes Focus Layer, a Chrome extension built using the Chrome Extension API to reduce distractions by blocking selected websites during study sessions, helping users maintain productivity and focus.

**ASHA-AI (Smart ASHA Connect)** **NOVEMBER-2025**

Developed an installable Progressive Web App that digitizes patient surveys, emergency response, preventive screening, and healthcare coordination for ASHA workers in rural India. Features include patient registration with centralized health records and vitals tracking, an emergency SOS alert system with doctor and ambulance dispatch, preventive screening modules, patient health analytics, a multilingual AI chatbot (English, Kannada, Hindi), and an admin panel with intelligent patient prioritization.

**Parking Slot Finder** **JUNE-2025**

Developed an APP based parking slot finder system which helps to populate the parking lots posted by the owner and connect the customers in need of parking on hourly/monthly basis. Integrated AI based classification of parking slots and categorization based on the uploaded photos. The slot recommendation is given to customer before booking the parking slot.

**VTU SGPA/CGPA Calculator** **NOVEMBER-2024**

Developed a simple Python-based application to calculate SGPA and CGPA for VTU students. Automated grade calculations using user input for subjects and credits from xlsx input. This system provides predictions based on inputs from user and current CGPA and also provides graphical view of CGPA.

## HACKATHON EXPERIENCE

**VIBEXATHON STATE-LEVEL HACKATHON, 2026** **MARCH 16–17**

PROJECT: T7SkillUp

Secured **SECOND PRIZE** • Fourth consecutive hackathon win

- Built T7SkillUp, a unified ecosystem to bridge the gap between students and a clear, industry-aligned learning roadmap.
- Resume and progress analysis tracks skill development and highlights gaps in real time; institutional dashboards let colleges monitor and measure student growth.

**24 HR HACKATHON – KRISTU JAYANTI UNIVERSITY, 2026** **FEBRUARY 10–11**

PROJECT: ASHA-AI (Smart ASHA Connect)

Secured **FIRST PRIZE** with a cash award of INR 8,000 • Third consecutive hackathon win

- Developed a digital operations platform for ASHA Karyakartas to manage beneficiary records, field visits, and service follow-ups.
- Implemented emergency alerts, ambulance assignment, and admin-led public health announcements to improve coordination and healthcare response.

**NEXATHON'25 – DR T THIMMIYA INSTITUTE OF TECHNOLOGY, KGF, 2025** **NOVEMBER 28–29**

THEME: AI-BASED CLASSROOM ENGAGEMENT AND ANALYTICS

Participated in a 24 Hr hackathon and Secured **SECOND PRIZE**

- Developed an AI-based, real-time classroom engagement analysis system to monitor student attention and participation during lectures.
- Analyzed facial cues, gaze direction, head movement, and hand-raising from live classroom video to generate actionable engagement insights for instructors.

**GCEM HACKS 3.0 – GOPALAN COLLEGE OF ENGINEERING AND MANAGEMENT, BANGALORE, 2025** **NOVEMBER 6–7**

THEME: HEALTHCARE

Participated in a 24 Hr hackathon and Secured **SECOND PRIZE**

- Developed a digital operations platform for ASHA Karyakartas to manage beneficiary records, field visits, and service follow-ups.
- Implemented emergency alerts, ambulance assignment, and admin-led public health announcements to improve coordination and healthcare response.
